PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience delivering production web applications for real clients across government, enterprise, and startup sectors. Proficient in Laravel, React, TypeScript, and cloud infrastructure (Docker, Railway). Skilled at automating complex business processes, integrating third-party services, and delivering end-to-end solutions independently.

WORK EXPERIENCE

Freelance Full Stack Developer · Self-Employed

Dec 2025 – Present

Laravel · React · TypeScript · Shadcn UI · Docker · Railway

- Developed a full project management system with custom file management, digital signing, and automated business process workflows for a solar energy client onboarding investors and installation companies.
- Engineered a document automation system that replaced 100–200+ manual fields with a minimal input form, auto-computing and populating certain fields across 20+ pages in Word document in a single click.

Full Stack Developer Intern · OBX Solutions Technology Inc.

Feb 2026 – May 2026

Laravel · React · TypeScript · Shadcn UI · Railway

- Collaborated with a development team using Git and GitHub to build and deliver HRIS, document tracking, and inventory management systems for real government and public-sector clients.
- Architected and deployed a railway bucket for scalable, secure government document management.
- Contributed to the development and launch of a public-facing microsite for the Philippine Rural Development Project (PRDP), handling deployment to Railway for a 3-day public event.

PROJECTS

PRDP Mindanao Cluster: Public Programme Information Site

Apr 2026

Laravel · React · TypeScript · Shadcn UI · MySQL · Railway

- Contributed to the development and deployed a public-facing website for the Philippine Rural Development Project (PRDP) Mindanao Cluster, showcasing regional initiatives, projects, and stakeholder collaboration opportunities.

New Wing Renewables: Document & Workflow Automation Platform

Dec 2025 – Present

Laravel · React · TypeScript · Shadcn UI · DocuSign · Docker · Railway

- Integrated DocuSign API for legally binding e-signatures and built custom document approval lifecycle workflows covering validation, status tracking, authorization, file uploading and asynchronous services such as word to pdf converter.
- Dockerized and deployed to Railway; built cloud file management backend using railway bucket.

LifeLine Connect: Blood Donation Management System

Jun 2025

Laravel · Vue · TypeScript · Shadcn UI · WebSockets

- Implemented real-time blood inventory sync via WebSockets and role-based access control across donor, staff, and admin roles.
- Implemented a blood drive management system and a map containing the geometry of barangays and municipalities for visualization and mapping.

EDUCATION

Bachelor of Science in Information Technology — Major in Software Development

Expected Jul 2026

Central Mindanao University

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, Java, Dart

Frameworks & Libraries: Laravel, React, Vue, Flutter, Tailwind CSS, Shadcn UI, Leaflet.js

Databases: PostgreSQL, MySQL, Supabase, Firebase

Cloud & DevOps: Docker, Railway, Vercel, Git, GitHub

APIs & Integrations: REST API, WebSockets, DocuSeal API

Practices: Agile/Scrum, Role-Based Access Control, Document Automation
