PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience delivering production web applications for clients in government, enterprise, and startup sectors. Proficient in Laravel, React, TypeScript, and cloud infrastructure (Docker, Railway, AWS). Automates complex business processes and integrates third-party APIs, and has delivered complete applications independently, end to end, in compliance-driven environments.

WORK EXPERIENCE

Software Developer Intern · OBX Solutions Technology Inc.

Feb 2026 – May 2026

Laravel · React · TypeScript · Shadcn UI · Railway

- Collaborated with a development team using Git and GitHub to build and deliver HRIS, document tracking, and inventory management systems for government and public-sector clients in compliance-driven environments.
- Contributed to building and launching a microsite for the Philippine Rural Development Project (PRDP), and deployed it to Railway for a 3-day public event.
- Served as support technical lead for deployment, requirements analysis, and system maintenance across HRIS and document tracking modules.

Freelance Full Stack Developer · Self-Employed

Dec 2025 – Present

Laravel · React · TypeScript · Shadcn UI · Docker · Railway

- Led a small team that built a solar-energy client's project-management platform with custom file management, e-signatures, and automated compliance workflows, and owned it from planning through deployment and maintenance.
- Engineered a document-automation system that replaced 100-200+ manual fields with a minimal form, auto-computing and populating 20+ pages of a Word document in a single click.
- Architected S3-compatible storage (AWS S3 / LocalStack) with a DocuSeal e-signature webhook that auto-ingests each legally signed PDF and audit trail into the bucket on completion.

PROJECTS

PRDP Mindanao Cluster: Public Programme Information Site

Feb 2026 – May 2026

prdpmin.online

Laravel · React · TypeScript · Shadcn UI · MySQL · Railway

- Contributed to the development and deployed a public-facing website for the Philippine Rural Development Project (PRDP) Mindanao Cluster, showcasing regional initiatives, projects, and stakeholder collaboration opportunities.

New Wing Renewables: Document & Workflow Automation Platform

Dec 2025 – Present

newwingrenewables.com

Laravel · React · TypeScript · PostgreSQL · Shadcn UI · DocuSeal · Docker · Railway

- Integrated DocuSeal API for legally binding e-signatures and built custom document approval lifecycle workflows covering validation, status tracking, authorization, file uploading and asynchronous services such as word to pdf converter.
- Dockerized and deployed to Railway; built cloud file management backend using s3-compatible railway bucket.

LifeLine Connect: Blood Donation Management System

Aug 2024 - Present

lifelineconnect.online

Laravel · Vue · TypeScript · PostgreSQL · Shadcn UI · Docker · Railway · Laravel Reverb

- Implemented real-time blood inventory sync via Laravel Reverb and role-based access control across donor, staff, and admin roles.
- Implemented a blood drive management system and a map containing the geometry of barangays and municipalities for visualization and mapping.

EDUCATION

Bachelor of Science in Information Technology — Major in Software Development

Aug 2022 - May 2026

Central Mindanao University

Magna Cum Laude

CERTIFICATIONS

AWS Cloud Foundations – Amazon Web Services

AWS Cloud Security Foundations – Amazon Web Services

TECHNICAL SKILLS

Languages: PHP, JavaScript, TypeScript, Python, Java, Dart

Frameworks & Libraries: Laravel, React, Vue, Flutter, Tailwind CSS, Shadcn UI, Leaflet.js

Databases: PostgreSQL, MySQL, Supabase, Firebase

Cloud & DevOps: Docker, Railway, Vercel, Git, GitHub, AWS

AI Tools: Claude Code, Claude Design, ChatGPT, Gemini

Practices: Agile/Scrum, Role-Based Access Control, Document Automation, REST API, MVC Architecture
